ClearPathGPS Fleet Tracking Software Recognized with Industry Honors by Directory for Business Software

[SANTA BARBARA, CA, Feb 6, 2019] Notching yet another piece of notable industry recognition, ClearPath's GPS Fleet Tracking Software was recently awarded a 2019 Rising Star Award, 2019 Premium Usability Award, and Verified Quality seal by FinancesOnline.com. ClearPathGPS also made it into the site's top 50 [fleet management companies](#).

Earlier this year, ClearPathGPS released a new version of their cloud-based GPS tracking solution, which has already been generating enthusiastic customer responses like this one from Short Load Concrete GM, Richard Cobarrubias, "I like the enhancement to the dashboard itself, the zoom feature per vehicle which now brings up the street view...Coming from a route dispatcher background I can see where some of these [new] features and others will be helpful to [my team]."

Says Steve Wells, ClearPathGPS CMO & Co-Founder, "our customers love that they are able to virtually ride shotgun along with every one of their drivers, as well as solve issues *before* they become problems. But, more than anything else, our customers love that they can depend upon our stellar US based customer success and support teams, which have a collective goal to never let our clients go to voicemail during business hours."

Companies both large and small that have made the switch from other GPS [fleet tracking software](#) vendors to ClearPath consistently note that their satisfaction is due to the company's responsiveness to issues that arise, platform ease-of-use, and dedication to helping their clients make the most of the tool. Says Richard Ross, Cal-Stripe Equipment Manager, "With 100 units being tracked I have had nothing but an amazing experience with ClearPathGPS. Always there when I need them or have a question. The trackers are just as nice, easy to install, as well as the dash board being very user friendly. Never have I second guessed going with ClearPathGPS!"
